Bill and Shawn:

Attached please find material from a citizen in Washington Township PA documenting her concerns regarding Marcellus Shale operations in her community.

## Ex. 5 - Deliberative

It is interesting to note the circuitous route this took in getting to region 3.

**Samantha/Troy/Chip:** I don't know if this was sent to you since it came from the Region II Regional Administrator. If you click on the pdf file there is an comprehensive description from a private citizen with some excellent photos regarding some of potential problems associated with oil and gas drilling in Pennsylvania.

Mr Kushner,

My Regional Administrator wanted me to send you the pdf on the super mister. The link for some reason did not work since the % actually need to be there. However, the photo essay is all over the web so I downloaded and attached it for your convenience. If you have problems opening it let me know. I am ccing two members of the OECA SIT team for On-Shore Gas Extraction & Production Initiative so they are aware. I will also be contacting other regions to see if they have other examples.

I have special concern about the misting heads shown in this photo essay. I would like to know why this private citizen has been able to identify so many flagrant violations, and while the PA DEP is doing what??? The EPA needs to take this over. Superfund sites are being created all over PA. See the photos on waste pits that have never been cleaned up. The companies are exempt from Superfund legislation, so who will pay for this massive clean up?
